

Report Assignment 3

The features that we got working were quite a few. Let us start with the basics. We were able to create login pages for both student users and instructors. The following will be the features for the student and instructor users

Student Users:

- Create a new user
- Login if you are an existing user
- Navigate through website as it was in Assignment 2
- See all marks in Dashboard section
- See user's current grade in the course
- Submit remark/regrade request
 - They are able to type which evaluation they want regraded and why
- Submit anonymous feedback to instructors
 - Able to choose which instructor from a dropdown menu
 - Able to give instructor a rating out of 5 from drop down menu
 - Able to say likes and dislikes about teaching and labs
- Able to log out

Instructor Users:

- Create a new user
- Login if you are an existing user
- Navigate through website as it was in Assignment 2
- Able to edit or remove content in Syllabus tab, which will appear on student and instructor syllabus interface
- Able to edit or remove content in Assignments tab, which will appear on student and instructor assignment interface
- Able to edit or remove content in Labs tab, which will appear on student and instructor labs interface
- Able view all feedback, no student information is given
- Able to create assignments in dashboard page
- Able to create labs in dashboard page
- Able to create syllabus content in dashboard page
- Able to add to student's grades under evaluations
- Able to view all the grades of each student
- Able to view all regrade requests and remove them if necessary
- Able to log out

The work was done equally by both team members, with it being distributed 50 50 %.

Specifically:

Abdullah:

- Create dashboard page
- Able to update assignments and edit
- Able to view labs and edit
- Able to view student marks
- Able to view regrade requests
- Able to send regrade requests
- Able to send anonymous feedback
- Create feedback page
- Weighted average for students
- Figured out the table elements without using the table tag, and only using div elements

Shangar

- Create login page
- For both students and instructors
- Able to create new users
- Able to view assignments and syllabus
- Able to edit syllabus and course content
- Able to update student marks
- Able to view anonymous feedback
- Create database file
- Student able to view their marks
- Able to update to syllabus, labs and evaluations
- Able to remove regrade requests
